TABLE OF CONTENTS

Preface vii

Chapter 1 1

Information Systems and Impacts of Poor-Quality Data 1

Information Systems 3
Data Versus Information 3
Mandating Quality Information 4
Can We Legislate Good-Quality Information? 4
Information Warfare 5
Healthcare and Medical Profession 6
Public Sector 8
Private Sector 10
One College Example—Student Evaluations 12
Impact of Total Quality Management in the Manufacturing World 14
An Example of an Information Quality Problem in an Engineering Laboratory 15
Summary 17
Chapter One Questions 17
Review Questions 17
Discussion Questions 18
References 19

Chapter 2 23

Total Quality Management 23

Background 23
The Need for Better Techniques 25
Loss Function 27
Control Systems Approach 28

Evolution of Total Quality Management 29
Total Quality Management Awards 32
TQM Needed within Information Systems 35
Summary *36*
Chapter Two Questions *36*
Review Questions 36
Discussion Questions 37
Research Project 37
References *38*

Chapter 3 **39**

The Multiple Dimensions of Information Quality **39**

Introduction *39*
Definitions of Quality *40*
Wang and Strong Quality Framework *41*
Categories 44
Dimensions 44
Interactive Relationships of Dimensions *48*
Data Quality Dimensions and Reasons for Developing Systems 49
NASA's Space Shuttles *51*
Columbia 51
Challenger 51
Management Information System 52
Database 53
Reporting 53
The USS Vincennes and Iran Flight 655 *55*
Data Quality 55
Time 57
Summary *57*
Chapter Three Questions *58*
Review Questions 58
Discussion Questions 58
References *59*

Chapter 4 **63**

Information Products and Total Data Quality Management **63**

Introduction *64*

Information Products 64
Total Data Quality Management 70
TDQM's Four Steps 71
Define the Information Product 71
Measurement 71
Analysis 73
Improvement 76
From TQM to TDQM 76
Development Stages and Activities 77
Information Product Manager 79
Information as a Byproduct 80
Establish TDQM Program 82
Acxiom Corporation Introduced TDQM 82
Summary 84
Chapter Four Questions 84
Review Questions 84
Discussion Questions 85
References 85

Chapter 5 **87**

Statistics **87**

Introduction 87
Data Collection 89
Random Sampling 90
Descriptive Statistics 91
Shape, Location, and Spread 93
Probability Theory 96
Conditional Probability and Independence 97
Bayes Theorem 99
Random Variables 101
Probability Distributions 102
Inferential Statistics 105
Sampling Theory and Point Estimates 105
Unbiased, Efficient, and Consistent Estimators 107
Small Sampling and the Student's *t* Distribution 110
Hypothesis Testing 112
Tests Involving Two Samples 117
The Chi-Square Distribution 118
The Chi-Square Test 119
Summary 120
Chapter Five Questions 121

Review Questions 121
Discussion Questions and Exercises 121
References *123*

Chapter 6 **125**

Controlling Information Product Quality **125**

Introduction *126*
Acceptance Sampling *126*
Design of experiments *128*
Pareto Charts *130*
Control Charts *132*
Number nonconforming charts (np chart): 135
Fraction nonconforming charts (p chart): 136
Areas of opportunity charts (same size): 136
Area of opportunity charts (variable size): 137
Capability Analysis *139*
Six Sigma *140*
Summary *141*
Chapter Six Questions *141*
Review Questions 141
Exercises 141
References *142*

Chapter 7 **143**

Measuring and Tools for Assessing Data and Information Quality **143**

Introduction to the Need for Measurements *144*
Benchmarks 145
Information Quality Assessment *146*
IQA Section 1, Characteristics of the Information 148
IQA Section 2, Information Quality Assessment 150
IQA Section 3, Information Quality Context Assessment 153
IQA Section 4, Importance of IQ Dimensions 156
Objective View—Integrity Analyzer *159*
Integrity Analyzer 159
Prioritizing DQ Improvement Projects *165*
Record Matching with ChoiceMaker *167*
Summary *168*

Chapter Seven Questions *169*
Review Exercises 169
References *171*

Chapter 8 **173**

Decision Support and Business Intelligence **173**

Introduction *174*
Data, Information, and Knowledge *174*
Seeking Business Intelligence *176*
Data Warehousing *179*
Analytical and Operational Databases 180
Data Warehouse Architecture 181
Data Warehouses Versus Data Marts 183
Dimensional Modeling 183
Data Warehouse Metadata 187
Quality Issues of Data Warehousing 188
The Issue of Integration 189
Data Quality Enhancement 191
Data Quality Information and Data Tagging 192
Data Mining and Knowledge Discovery 193
Data Quality and Data Mining 196
Summary *197*
Chapter Eight Questions *197*
Review Questions 197
Discussion Questions 198
References *198*

Index **201**
